

To facilitate a solid reputation for producing quality parts, achieving timely delivery, and providing competitive pricing, our organization has developed a Quality Management System to better satisfy the needs of its customers and to continually improve the overall management and success of the company. In doing so, this Quality Policy has been formulated, implemented, and is committed to:

- Consistently meeting customer requirements
- Always providing our customers with the best products available
- Continually improving the Quality Management System and the service we provide to our customers
- Adhering to all customer requirements, as well as those defined in the international standard AS9100

In an effort to make our policy memorable to all employees and customers, we have decided to adopt a Quality Slogan that we feel incorporates all the statements listed above. That slogan is:

"Quality Manufacturing, Intelligent Solutions"

Specific Quality Objectives that support this commitment are set forth in Appendix B and are periodically reviewed by Management.
